

ROYAL OIL CO.

SPECIALTY LUBRICANTS

ROYAL-EEZ

Oil Based Penetrant

Penetrates Quickly

Oil, Not Solvent Based

Excellent Resistance to Water

Offers EP Chemistry

Prevents Rust/Oxidation

Lubricates/Prevents Seizing

ROYAL-EEZ is a prime example of the care we put into building a product. Most penetrating oils on the market are designed to help in anti-seize applications and little else. Seizing occurs when moisture causes metal to oxidize and virtually surface weld itself to another metal surface. Traditional penetrating oils may aid in the release, but their inability to lubricate and shed moisture lead to further and more frequent seizing. ROYAL-EEZ's oil based penetrating formula is the key to release and protection from future rust/corrosion that's leads to more time-consuming and costly issues.

“Take Royal-Eez and the penetrant you’re using now, spray both into separate jars of water, shake and observe for a few days. The water shedding is far superior, meaning better protection and reduced consumption.”

ROYAL-EEZ

Product Specifications

| | |
|-------------------------|--------------|
| Wt./Gal. | 6.83 |
| Color Light | Amber |
| Odor | Mild Solvent |
| Flash Point, °F. | 160 |
| Calcium, Wt. % | 0.10 |
| Magnesium, Wt. % | 0.02 |
| Zinc, Wt. % | 0.05 |
| Limited E. P. Compounds | Present |
| Penetrating Value | Excellent |

Sharing lubricant knowledge and delivering the highest quality products, two things we promise our customers. The difference will change how you view, purchase and utilize greases and oils from here forward.

Family owned and operated since 1926.
