

ROYAL OIL CO.

SPECIALTY LUBRICANTS

WIRE ROPE LUBE

Premium Oil Design to Penetrate

Premium Quality Base Oil

Designed to Penetrate

Protects from Inside Out

Eliminate Rust/Corrosion

Excellent Moisture Barrier

Extends Service Rope Life

“Even though we offer an award-winning grease and the industry’s best engine oil, we can proudly say Wire Rope Lube is right there as one of our most effective products.”

Wire ropes, like chains, are often overlooked when discussing extreme lubricant applications. With every increase or decrease in load/tension a wire rope has thousands of wear/friction points that can lead to catastrophic failure and shortened rope life. Royal’s wire rope lube is specifically designed using premium quality base oils with penetrating characteristics. By lubricating from the core to the outside all friction points are protected, offering premium performance and service life. To prevent rust/corrosion and breakdown from the elements, WIRE ROPE LUBE leaves behind a film of protection on the exterior after curing.

WIRE ROPE LUBE

Product Specifications

There are several ways to apply WIRE ROPE LUBE. The product is applied by brushing, spraying, pouring as well as drip and force feed applications. Some even run the wire rope through a trough or bath of lubrication. Remember: ordinary coatings or compounds applied to the outside of a wire rope do little to give the inner-lubrication necessary for extended wire rope life.

Flash Point, °F., C.O.C.	125
Fire Point, °F., C.O.C.	150
Viscosity, SUS at 210°F.	56.4
Ash, Wt. %	0.2
Water Resistance	Good

Sharing lubricant knowledge and delivering the highest quality products, two things we promise our customers. The difference will change how you view, purchase and utilize greases and oils from here forward.
